We appreciate your purchase of the TID-1800HP.

This manual should be read thoroughly before operation and kept for future reference. Thorough understanding of the instructions will contribute to efficient, troublefree operation.
SUMMARY

The idea behind the TID-1800HP is to provide a localized supply of cool and heated air.

The TID-1800HP will greatly enhance your personal comfort whether at a work station or even in your favorite chair.

Four (4) casters enable you to move the TID-1800HP easily from room to room. It cools and dries the air at the same time so that you can stay comfortable even when it’s humid or rainy outside. It also puts the warm where you want it in cold winter.

Conventional air conditioners use large quantities of energy to cool or heat an entire room, including walls and furniture. The TID-1800HP creates a zone of cool and dry or heated air only where it is needed. It does not waste energy cooling or heating the surroundings.

High efficiency Rotary Compressor runs smoothly on less power than conventional compressors giving you lower energy consumption and quieter operation.

It’s easy to operate. Once you set the desired function, all functions will be memorized in the unit. The built-in timer allows from 1/2 to 6 hours operation, after which the TID-1800HP is automatically turned off. This is especially convenient at bedtime.

Venting is not required. However, if the TID-1800HP is to be used exclusively in one space, the cooling efficiency will be enhanced by using the venting kit accessory.

OPERATIONAL FEATURES

1. COOLING/HEATING OPERATION:
   Normally, cool/heated air is directed out the front louvers by the circulation fan which has two (2) stages of fan speed.

2. AUTOMATIC OPERATION:
   Once the desired function has been set, it is memorized as long as it remains connected to the wall outlet. In the event of a power failure, the desired function must be re-entered when power is restored.

3. TIMER OPERATION:
   The timer will shut off unit after the designated period of time (1/2 hr., 1, 2, 4, or 6 hours).

4. AUTOMATIC OSCILLATING LOUVER:
   The vertical louvers oscillate back and forth automatically 45° from right to left and distribute the air evenly. Or you can lock in a fixed position to direct the output in a constant direction.

5. AUTOMATIC SHUT-OFF MECHANISM WHEN DRAIN TANK IS FULL:
   When the drain tank is full, unit will be automatically shut off. It is always required to press power button twice to resume operation after the condensed water is removed from the tank.

6. AIR FILTER
   Air filter cleans circulation air.

2. SAFETY TIPS

CAUTION: READ INSTRUCTIONS CAREFULLY BEFORE OPERATION.

- The unit should be operated when the room temperature is between 60°F/15°C to 95°F/35°C (Cooling) or 41°F/5°C to 77°F/25°C (Heating).
  If the room temperature is below 60°F/15°C (Cooling) or 41°F/5°C (Heating), ice may form on the coils. If the room temperature is above 95°F/35°C (Cooling) or 77°F/25°C (Heating), the compressor will automatically shut off to protect itself.

- Keep unit more than 20 in. (50cm) away from any objects or wall.

- If the unit is operated in COOL mode in an area of very high moisture, the top plate and the rear plate may get covered with a mist. Wipe off any mist before it has a chance to get on the floor or rug.

- Remove drain water tank before moving unit.

- **NEVER** insert objects of any kind into the air intake or air outlet.

- **DO NOT** unplug if your hands are wet. An electrical shock may occur.

- **DO NOT** operate in a wet location.

- **DO NOT** operate in direct sunlight.

- **ALWAYS** plug into 120 volt/60Hz electric outlet. Use single phase outlet or 20 ampere circuit.

- Be sure plug fits receptacle securely.

- **DO NOT** run power cord under carpets, rugs, or floor mats of any kind.

- **DO NOT** attempt to shorten or alter power cord in any way.

- **DO NOT** turn off by removing the plug.

- **DO NOT** use an extension cord. Use cord connected unit only.

- **DO NOT** remove the plug less than fifteen minutes after operation in heating mode. Drain water could over flow the drain pan under the unit and possibly wet the carpets or the furniture.

- **DO NOT** use for such particular purposes as preservation of foodstuff, animals, plants, precision appliances, arts and medicine.

- **DO NOT** place an animal, plants or combustion equipment in a place which is subjected to the direct air blow of the unit.

- **DO NOT** operate the unit with wet hand.

- **NEVER** expose infants, handicapped persons, or senior persons directly to the airflow. Adjust the air flow direction.

3. OPERATION

BEFORE OPERATION:

1. Make sure drain tank is properly positioned.

2. Check that the filter is in place and clean.
OPERATING STEPS:

1. PRESS THE "POWER" BUTTON TO "ON."

   Power lamp is lit this time and unit starts.

2. PRESS THE "MODE" BUTTON.

   Pressing the mode button to set your desired operation mode
   "COOL", "FAN" or "HEAT".

   The "FAN" mode provides only circulation of room air.

   CAUTION: Use the unit in the range between 60°F/15°C to 95°F/35°C
   (Cooling) or 41°F/5°C to 77°F/25°C (Heating) except in
   "FAN" mode operation. The compressor will automatically
   shut off when room temperature is above or below this
   temperature range. The "COOL" mode lamp will flash
   below this range.

3. PRESS THE SELECT BUTTON.

   Press the select button to set the desired air flow rate.
   HI ......... Operation at a high air flow.
   LO ......... Operation at a low air flow.

4. PRESS THE AIR DEFOCTOR

   Press the "AIR DEFOCTOR" button to start automatic louvers.

   The vertical louvers will oscillate back and forth automatically 45° left
   to right. The louvers will be stopped by pressing the button again.

   CAUTION: DO NOT move the vertical louvers by hand. They may
   become damaged.

   The horizontal louvers may be set up and down manually in desired
   direction.

5. STOP OPERATION

   Press the "POWER" button and all lights will go out.
OFF TIMER

Press "TIMER" button and keep pressing "TIMER" button to set your desired off time.

In the "TIMER" operation, the TIMER LAMP will indicate the remaining time to turn off.

EXAMPLE: If you set at "4", the unit will shut off 4 hours later.

To cancel set time, press "TIMER" button until all lights are off. Unit will operate continuously.

4. CONDENSED WATER DISPOSAL

USING DRAIN TANK (STANDARD EQUIPMENT)
When the drain tank is full, the unit stops and "POWER" lamp will flash.

1. Open the front cover of the unit and carefully remove the drain tank from the unit after making sure the draining stops.

2. When replacing drain tank, always align an arrow on the tank, Otherwise condensed water may spill out of unit in operation.

3. Close the front cover.

4. Press the power button twice to resume operation.

NOTE: It is always required to press the power button twice to resume operation after moving the condensed water out of the tank.

CONTINUOUS DRAIN (WITHOUT USING DRAIN TANK)

1. Open the front cover and remove the drain tank.

2. Remove the drain plug from the right side cabinet.

CAUTION: Wear the protector such as gloves to prevent injury when removing the drain plug.
3. Connect a city grade vinyl hose (Try to use the standard hose connector or adapter which inner dia. is ø 9.5 mm (3/8") and outer dia. is ø 12.7 mm (1/2")) to the end of the drain pipe inside the unit and fasten in place with hose clamps. Use the hose clamps contained in the same package or the clamps fit to the hose to be used.

4. Pass the vinyl hose through the opening provided in the right side cabinet. Run the hose to a suitable drain location.

   **CAUTION:** To prevent leaks, ensure hose connections are tight.
   Care must be taken in the positioning of the hose. Do not have sharp bends or kinks hose.
   Keep hose and outlet lower than drain fitting of unit. At intervals, check whether water is appropriately drained.

5. **CLEANING**

   **CLEANING THE AIR FILTER**
   Clean the air filter once every two weeks. If filter is clogged with dust, it will reduce the unit's performance.
   1. To remove the air intake grill, raise the knob located in the center of the grill and pull the grill off.
   2. Remove the holder and take out the air filter
   3. Remove the dust with a vacuum cleaner.
      - **Filter has to be washed with mild soap or detergent in warm water (not over 95°F/35°C) and rinsed well. Dry thoroughly before replacing.**
      - **NEVER** wipe with cloth — it will ruin the filter.
      - **NEVER** dry the filter near an open flame.
      - **ALWAYS** use the unit with the air filter.

   **CLEANING THE SURFACES**
   Clean the outside of unit with a soft damp cloth.
   **NEVER** use gasoline, solvents, chemical products or polish as they could damage the surfaces.

6. **LONG-TERM STORAGE**

   At the end of each season, or when you do not plan to use your TID-1800HP for an extended period of time, the following procedures are recommended.
   1. Run the unit 5 or 6 hours with only the “FAN” operating in order to dry the inside.
   2. Empty the drain tank and unplug the unit.
   3. Clean the unit.
      Wipe off any dirt or dust on unit with a soft damp cloth, then wipe again using a soft dry cloth.
   4. Clean the air filter and replace it.
   5. Store unit.
      The original shipping carton is the best place to store your unit. If you do not have the original packing materials, cover unit with a large plastic bag and store in a cool dry place.

   **CAUTION:** Do not store your unit in a horizontal position.

BEFORE CALLING FOR SERVICE

The followings are not defects.

A hissing noise or hollow sound: ➔ This sound is generated from the refrigerant flowing within pipes.
A squeaking noise: ➔ This noise is generated from the unit when it expands or contracts with temperature changes.

Odor: ➔ Such odors as tobacco, cosmetics, or foods may accumulate in the unit.

The unit does not start nor change operation mode immediately: ➔ To prevent overloading the compressor motor, the unit will be stopped for more than 3 minutes.

The fan speed of the front fan motor changes front or the rear fan motor stops: ➔ To prevent overloading the unit, the unit may change the fan speed and operate the rear fan intermittently.

In the “HEAT” mode, the defrost/preheat lamp is lit: ➔ This lamp will light at the starting time and at the preheating time. This lamp will flash in the defrost operation and front fan will stop.

The water draining sound after turning off at the “HEAT” mode: ➔ Drain motor continues to run for approx. 15 minutes after turning off at the “HEAT” mode.

NOTE: Cooling air capacity will vary according to temperature and humidity of the room.
      Do not turn the unit on its side or upside down.
9. VENTING KIT ACCESSORIES

USING EXHAUST DUCT SET

EXHAUST DUCT SET
(Part #20456651)
Max. 39-3/8 in.

ASSEMBLY & INSTALLATION:
1. Insert ends of Exhaust duct hose (flexible tube) into Air outlet nozzle and Exhaust duct "A" by twisting until it stops.

2. Fix the Exhaust duct "A" to the exhaust outlet on the rear of the unit. This is achieved by sliding the appropriate connector downwards over the exhaust outlet ensuring that the lugs on the outlet are engaged with the grooves on the connector.

3. Extend the Exhaust duct hose and close the window as far as possible trapping the Air outlet nozzle.

NOTE: Place the unit as close as possible to the window.

USING WINDOW PANEL KIT

NOTE: Window installations are possible by the use of the exhaust duct set and window panel kit.
Window panel kit (S) provides a weather-tight adapter for double-hung windows 24-3/4 in. (630 mm) to 36 in. (915 mm) wide, and for sliding windows 24-3/4 in. (630 mm) to 36 in. (915 mm) in height.

PLASTIC WINDOW PANEL KIT (S)

</tr>
<tr>
<td>4</td>
<td>Screws (4 x 16 mm) (Part #20456257)</td>
<td>4</td>
</tr>
</tbody>
</table>
ASSEMBLY & INSTALLATION OF PANEL

1. Fix Nozzle fitting ③ to Plastic panel ① by four (4) screws ④.

2. Hook Exhaust duct cover ② onto Nozzle fitting ③.

   **NOTE:** When using the panel for sliding windows, cut the both edges of Exhaust duct cover with scissors.

3. Install the panel in the window and adjust the length of the panel by lengthening or shortening.

4. Slide Air outlet nozzle into Nozzle fitting ③ until it locks.

5. Fix Exhaust duct “A” into the exhaust outlet on the rear of the unit.

   **NOTE:** The same procedure can be adapted for vertical installation in sliding windows.

OPTIONAL ACCESSORIES

When you need a longer size window panel, please purchase the extension window panel “B” and use it with the original window panel “A”.

LIMITED WARRANTY

TOYOTOMI U.S.A., INC ("TOYOTOMI") warrants each product and any parts thereof sold by it to be free from defects in materials or workmanship under normal use and service for TWELVE (12) MONTHS* from the date of delivery to the original purchaser at retail subject to the following terms and conditions:

WHAT IS COVERED: Product or any parts thereof which are defective in workmanship.

WHAT IS NOT COVERED:
(1) This warranty does not extend to any defect due to the negligence of others; failure to install, operate or maintain unit in accordance with installation instructions (operating and maintenance instructions are furnished with each new unit); unreasonable use, accidents, alteration, use of unauthorized or non-standardized parts and accessories; electrical malfunction, i.e., as resulting from large power surges, short circuit, etc.; incorrect installation; or repair by anyone other than a service facility specified by TOYOTOMI.

WHO IS COVERED: The original purchaser at retail.

WHAT WE WILL DO: TOYOTOMI will either repair or replace, at its option, all defective parts free of charge that are covered by this limited warranty on a carry-in basis, to your nearest authorized dealer or distributor of TOYOTOMI.

WHAT YOU MUST DO FOR WARRANTY SERVICE: You must return the defective Product or part to any authorized dealer or distributor of TOYOTOMI with this LIMITED WARRANTY and a copy of your bill of sale or credit card charge receipt or other documents evidencing the date of the Products delivery. If service is not available locally, please contact our CUSTOMER RELATIONS DEPARTMENT at:

TOYOTOMI U.S.A., INC
Customer Relations Department
Tel: (203) 775-1909

THE FOREGOING EXPRESSES ALL OF TOYOTOMI'S OBLIGATIONS AND LIABILITIES WITH RESPECT TO THE QUALITY OF PRODUCT FURNISHED BY IT. ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING THE WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. TOYOTOMI SHALL NOT BE LIABLE FOR THE LOSS OF USE OF THE PRODUCT INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL ARISING OUT OF THE USE OF, OR INABILITY TO USE, THE PRODUCT OR DAMAGES RESULTING FROM OR ATTRIBUTABLE TO DEFECTS IN THE PRODUCT.

No one other than TOYOTOMI has authority to extend or modify the terms of this Limited Warranty in any manner whatsoever.

Some Provinces do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so these limitations or exclusions may not apply to you. This Limited Warranty gives you specific legal rights and you may also have other rights which vary from province to province.

* In addition to the warranty period stated above, an extended warranty period is offered as follows:
  - Compressor: 5 years
  - Cooling cycle: 3 years

TOYOTOMI U.S.A., INC
P.O. BOX 176, Brookfield, CT 06804-0176
